Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-14, drawn to brightness and color temperature comparison with RGB signal generator and system controller, classified in class 345, subclass 589.
 - II. Claims 15-23 and 28-35, drawn to the storage and detection of brightness and color temperature comparison, classified in class 345 subclass 593.
 - III. Claims 24-25, drawn to storage and detection of brightness and color temperature comparison, temperature, classified in class 345, subclass 204.
 - IV. Claims 26-27, drawn to a command applying unit providing references for brightness and color temperature, classified in class 345, subclass 747.
2. The inventions are distinct, each from the other because of the following reasons: Inventions I, II, III and IV are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination as claimed does not require the particulars of the subcombinations. The subcombination has separate utility such brightness and color temperature comparison

with RGB signal generator and system controller; storage and detection of brightness and color temperature comparison; storage and detection of brightness and color temperature comparison and a command applying unit providing references for brightness and color temperature.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. During a telephone conversation with Mr. Paul Bobowiec, Reg. No. 47,431 on or about 16 December, 2004, Mr. Bobowiec requested that examiner send a written requirement for the benefit of the client.
